

Merano Trolley

TON

You will truly appreciate the trolley, made of beech wood, and its handiness when you need to move Merano chairs. Up to 13 upholstered – or 14 plain chairs, can be stacked, one upon another. The minimum width of doors, for which the trolley is designed, is 60 cm. We deliver the trolley – in black; its whole perimeter is protected by a robust rubber strip. Its stability is also helped by vario-braked wheels that help in overcoming conventional surface irregularities – like thresholds for instance.
